I travel to New York City and Boston regularly, and rely on XM Traffic and weather. Because the reports are available to me even before I leave my home town in upstate NY, I can plan my trip before hitting the problems that they are announcing. Neither city offers comparable local radio services - certainly not on the schedule that XM maintains or in any way that I can utilize before arriving in those cities. Please allow XM radio to continue to provide this necessary, valuable service to me and the thousands or perhaps millions of others who rely on it. Thank you.
